

Illegal Drug Use

The Church of Reality in general discourages the illegal use of drugs. If a drug is illegal there is often, but not always, good reason for it. Having said that Marijuana is a notable exception.

Sometimes drugs are made illegal for political reasons. Regardless, with any illegal drug there is the issue of getting caught and whether the cost of getting caught is worth the benefits of doing the drug. In many cases it is not. In some jurisdictions some drugs are illegal but not enforced. Some countries will execute you for smoking a joint.

As with legal drugs the Church of Reality urges realists to be smart. Always fully understand the effects of the drug you are using and the proper doses, side effects, and anything else that might lead to a decision that you will regret. As always, wisdom is required and one should really think things through when using any substance whether legal or not.
