

The Fish with Feet

The fish with feet represents evolution. It is a symbol that says that we believe that Darwin was right. It is a recognized symbol of a commitment to scientific principles. Evolution is a central concept in the Church of Reality. Not only do we know that we evolved, but we are still evolving. We embrace our evolution as a way to improve ourselves and advance in our exploration of reality as it really is. Our first principle, The Principle of {In:Positive Evolution} is the core principle of our religion.
